

A photograph of a worker in a yellow high-visibility shirt, blue pants, and a white hard hat, using a shovel to dig at a utility site. A wooden utility pole and a white SCEE van are visible in the background.

Fitness for Work policy statement

SCEE Electrical is unreservedly committed to the health and safety of its workforce and the protection of the environment in the provision of products and services.

SCEE Electrical values each individual employee and recognises that duty of care responsibilities and obligations are a reciprocal relationship between the company and its workforce. SCEE Electrical believes all injuries and occupational diseases are preventable and its priority is to prevent any fatalities, injuries and/or illness arising during the course of employment.

SCEE Electrical requires all its employees and subcontractors to take individual responsibility for their fitness for work. Fitness for work can be compromised by factors such as the consumption of alcohol and drugs, fatigue, stress, illness, or relationship breakdowns. Individuals must take all practicable and reasonable steps to ensure that none of the above factors impair their ability to safely and diligently carry out their work duties.

Random testing for alcohol and other drugs will be conducted from time to time at all SCEE Electrical workplaces. 'For Cause' testing will be conducted at management discretion to determine if alcohol and/or drugs were factors in any incidents involving injury or damage to plant or equipment.

Pre-employment testing for alcohol and other drugs will be conducted as part of an overall baseline medical assessment that includes a physical assessment, vision, hearing, and lung function testing. Project pre-mobilisation testing for alcohol and drugs will be conducted on both existing and new employees.

An individual who produces a positive test result for illicit drugs or alcohol after analysis of a urine sample by an accredited testing laboratory will, in the case of applicants for employment, not be engaged. Existing employees who test positive will be subjected to company disciplinary processes unless it can be demonstrated that prescribed drugs or medication affected the result and that these substances will not cause impairment.

SCEE Electrical will offer its employees access to an accredited employee assistance provider to help individuals.
